SEKISUI
Focus on tomorrow.
Our solutions, your way.

Performance that matters

We are SEKISUI in Europe – the trusted partner for innovative and sustainable high-performance solutions. SEKISUI in Europe was established in 1962, has around 1,000 employees and encompasses nine companies.

Numbers only tell half the story of our company though. They do not reflect what we stand for and what we believe in: our philosophy and values that have evolved for more than 60 years – as well as our commitment to quality, innovation and sustainability.

Our unique, cooperation-oriented approach makes us a reliable partner for companies in many industries. The goal: to develop sustainable solutions in partnership with our customers to enable them to improve people's lives and shape a better tomorrow for everyone.

Our companies in Europe

With nine different companies in various countries all over Europe, we serve four business sectors with a focus on quality, innovation, and sustainability.

SEKISUI EUROPE B.V.
European headquarters of the SEKISUI CHEMICAL Group, acts as a link between Japan and Europe and enables sustainable business growth.

SEKISUI ALVEO AG
Provider of solutions in high-performance polyolefin foams, working closely with customers to engineer new purpose-designed value-enhancing foams.

SEKISUI CHEMICAL GMBH
Advanced products and engineering solutions supported by the import of products from Japan and overseas. Market research and business development for innovations.

SEKISUI DIAGNOSTICS GMBH
Supports sales of clinical chemistry reagents, point of care products and products for manufacturing blood collection tubes. Distributes, sells and services rapid-test products.

SEKISUI DIAGNOSTICS (UK) LTD.
Delivers products and services to improve patient care worldwide. Produces high quality enzymes and proteins for use in clinical diagnostic reagents and point-of-care devices. Provides marketing support for rapid tests and clinical chemistry reagents in EMEA.

SEKISUI ESLON B.V.
Specialized in the production and sales of building products made from recyclable PVC, including rain gutters and panels.

SEKISUI POLYMATECH EUROPE B.V.
Produces and markets high-performance thermal Gap Filler materials for European based battery and EV technology programs with state-of-the-art features.

SEKISUI S-LEC B.V.
World leader in PVB interlayer film technology for the automotive and architectural industry, with excellent production facilities and advanced technology to meet the customer's needs.

SEKISUI SPECIALTY CHEMICALS EUROPE S.L.
Produces and sells high quality polyvinyl alcohol products, while expanding on new applications and delivering consistent quality and service to customers worldwide.

Shaping the future

Our business model is based on sustainability, one key factor to our success. Our commitment to the Sustainable Development Goals reflects our efforts for a better future – socially and ecologically.

Our business sectors

The approach to improve lives and drive innovation by quality is shown in our extensive product range in four European business sectors: ultra-lightweight mobility components, essential components for electrical appliances, long-lasting materials for urban environment and infrastructures and high-quality medical components.

Mobility

We help to shape the mobility of tomorrow by driving the change towards innovative and sustainable solutions with future requirements in mind.

Construction and Infrastructure

We provide innovative and high-quality solutions for the highest demands in residential housing, urban infrastructure and industrial applications.

Electronics

We develop tailor-made solutions for smartphones, cameras, drones, wearables and electronics to meet the users' needs for performance and stability.

Medical and Diagnostics

We aim to improve patient care with our systems and reagents and provide laboratory and research environments with enzymes and biochemicals for accurate and timely diagnosis.

Japanese origin, global operations

All our European companies are part of the SEKISUI CHEMICAL Group, headquartered in Tokyo and Osaka, Japan.

Founded in 1947, the Group employs more than 26,000 people in around 200 companies all over the world.

The Group provides the global approach to our work as well as our common values.

Improvement as a global effort

There are hard facts to measure a company's success, such as size, geographical reach and profit. But we also measure our success based on how we can improve peoples' lives and protect the environment. In short: Our success is more than our profit – it is the good we do by finding solutions for the needs of society.

Evolved values

The will to improve the lives of the people and our planet developed with our company.

By its long-term *Vision 2030* SEKISUI strives to resolve social issues by business growth, reform and creation – centered on ESG management. The vision statement "innovation for the earth" embodies the aim to realize a sustainable society through innovation and continue to create "peace of mind for the future".

We recognize our global role by contributing to the United Nation's Sustainable Development Goals (SDGs) as we believe that our work can impact peoples' lives for the better. That's why we seek to resolve social issues and thereby transparently create a more sustainable society.

These beliefs come to life in what we do – every day and with every innovation we develop.

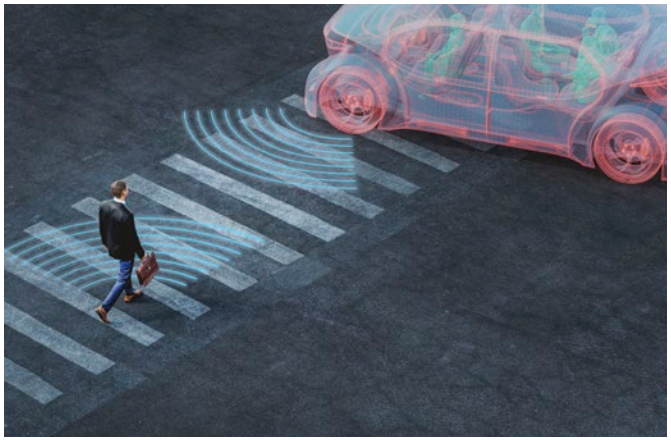
The proof is in the products

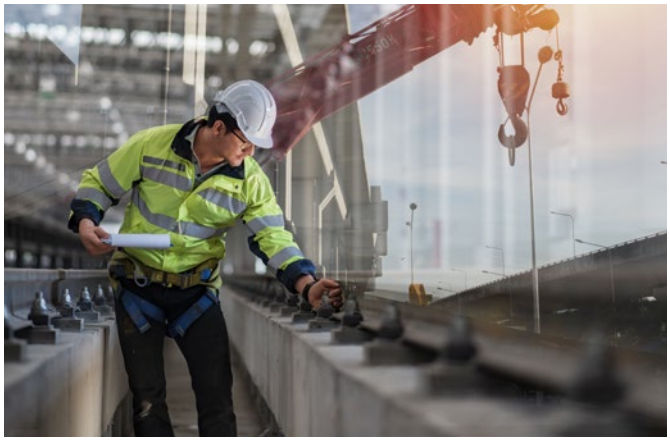
Mobility of the future

More than 75% of cars in Europe are equipped with at least one of our pioneering technologies for the mobility industry. This does not only pay off in terms of less energy and fuel consumption, but our materials also enhance passengers' safety and comfort.

Construction and infrastructure for humans

We make sure that urban habitats are safe, convenient, and enjoyable. We tackle the challenges in the construction and infrastructure sector by providing new solutions for residential housing, urban infrastructure and industrial applications to grant a quieter and more reliable urban life.





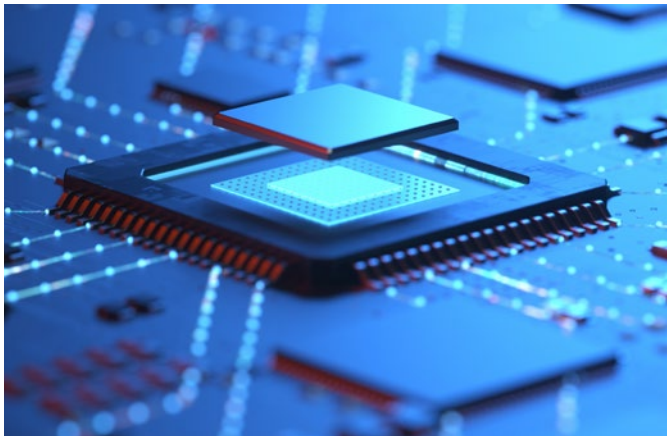
Learn more about our products

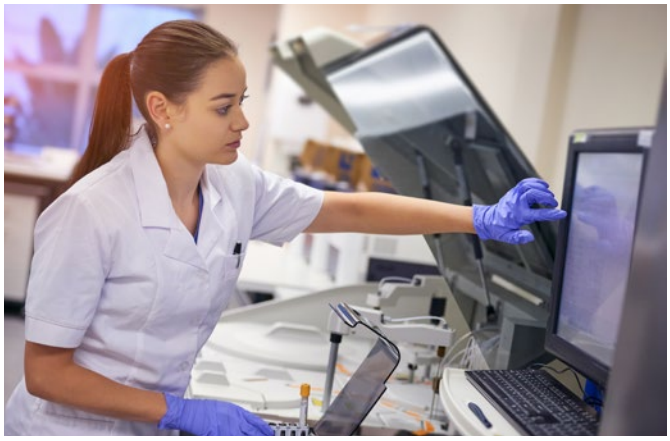
User-centric electronics

Technology is as good as its components. Therefore, we work on tailor-made solutions for smartphones, cameras, drones, wearables and electronics. And we are working with the user in mind – by boosting performance, improving heat transfer, and ensuring stable functionality.

Medical and diagnostics for humans' health

Our medical products contribute to the health of people worldwide. It started with the first ever plastic vacuum blood collection tube. Now we pioneer in diabetes and coagulation research, infectious disease control, diagnostic enzymes, and rapid tests.





Our commitments: innovation, quality, and sustainability

To fulfill our customers' needs and create a brighter future for everyone, all European SEKISUI companies have three essential commitments: We focus on sustainability, innovation, and quality – so our customers can focus on their success while shaping the world of tomorrow.

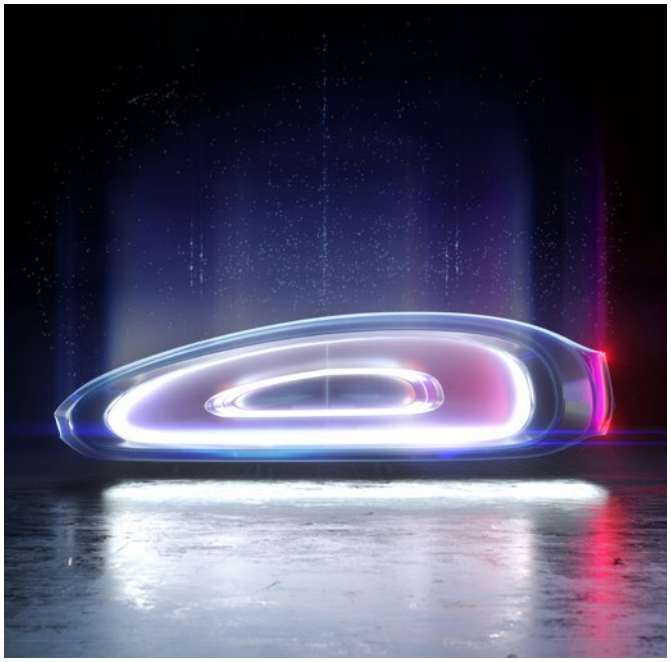
We are proud of being selected as one of the Global 100 most sustainable companies for several years in a row.

Cutting-edge innovation

Driving tomorrow with tailor-made innovations by taking on new challenges, adapting to change and staying ahead of times. Thanks to our creative thinking, we are convinced that we will always find the right solution for our customers – over 5,570 patents assigned to SEKISUI worldwide prove us right. And so does our relationship with our customers: We invite them to challenge us to deliver the innovations they need.

Reliable quality

All our products are high-quality solutions that are built to last. Because sustainability can only be achieved by providing outstanding quality that stands the test of time. Therefore, we offer durable, reliable, and environmentally sound solutions that customers can rely on.



"We remain conscious that the business activities we carry out incorporate the Earth's natural capital as well as meaningful social capital from society"

SEKISUI Sustainability Report

Achieving sustainability

The commitment to sustainability and the desire to harmonize business growth and environmental responsibilities are ingrained in our corporate DNA: We have been dedicated to advancing social and environmental issues since our foundation. And this goes beyond our products and their lifecycles. Understanding the many facets of sustainability and to strengthen ESG management as basis for our long-term vision, we have defined further key areas such as human resources, governance and digitization – all important to shape the future.

Our medium and long-term environmental initiatives are one of the cores of our ESG management, aiming at protecting the earth, nature and environment as best as possible.

Climate change

SEKISUI has committed to reducing greenhouse gas emissions generating during production and aims to generate electricity from renewable sources by 2030. One of the steps towards our vision of a carbon-neutral society.

Circular economy

A resource recycling strategy and less use of virgin raw materials help to become a sustainable society. We promote innovations for recycling, expand the use of non-fossil fuel-based materials and recycled materials in our business operations and maximize resource recovery during the entire product life cycle.

Water conservation and biodiversity

Water is a precious resource. SEKISUI is committed to water conservation and the protection of local biodiversity. Operating a water and infrastructure-related business, we know the need to handle water risks. To solve water-related issues in local communities, we provide products to conserve water and enhance sustainability.
